

TRUSTECH 2025

AN EDITION THAT CONFIRMS THE EVENT'S CENTRAL ROLE IN THE GLOBAL ECOSYSTEM OF PAYMENTS AND IDENTIFICATION

From 2 to 4 December 2025, Paris Expo Porte de Versailles hosted a new edition of TRUSTECH, bringing together the entire international ecosystem of payment solutions, digital identification and trust technologies.

Over three days, exhibitors, institutions, experts and decision-makers gathered to share insights, forward-looking perspectives and hands-on experience on the major trends reshaping their industry: interoperability, digital sovereignty, cross-border payments, instant payments, artificial intelligence, crypto-assets and enhanced security. Conferences, demonstrations, exhibitors, partners and business meetings all contributed to a programme designed to provide clear understanding of the sector's strategic challenges.

With 7,700 attendees from 104 countries, 197 exhibitors (82% international) from 35 countries and 115 speakers, TRUSTECH 2025 once again confirms its strong appeal and stands out as an unmissable event for the global payments and digital identity ecosystem.

TRUSTECH 2025 once again reflects the dynamism of our industry: a market undergoing rapid transformation, driven by digital evolution, security requirements, interoperability, performance and responsibility. The enthusiasm of exhibitors, the richness of the discussions and the quality of the solutions presented all demonstrate the strategic importance of TRUSTECH within the international ecosystem. We are already preparing a 2026 edition that will meet these ambitions.

Olympe Touchais
TRUSTECH Event Manager.

Beyond technological innovation, the 2025 edition stood out for the quality of the discussions and the event's ability to provide a unique space for analysing market developments, fostering synergies and supporting the emergence of new projects.

TRUSTECH INNOVATION AWARDS 2025: FOUR OUTSTANDING SOLUTIONS HONOURED

A highlight of the event, the TRUSTECH Innovation Awards celebrated four standout innovations in the sector:

IDENTIFICATION SOLUTIONS CATEGORY

iai industrial systems
part of HIC
